

Why choose PSC Flooring for your industrial flooring?

-  Competitive Pricing
-  Unbeatable Products
-  Excellent Service
-  Experienced Advice

The complete package

Resin Flooring Systems

With a skilled resin flooring team, we are able to offer Epoxy High build coatings and screeds, Polyurethane coatings and screeds, and Cementitious Pump Screeds. As well as, Anti slip and Anti-static flooring, Damp proof membranes, Hygienic resin flooring and Food grade flooring. Additionally, our contractor services offers bespoke industrial flooring decorative systems and associated coving works.

PSC Flooring are Industrial flooring experts. Operating all over the UK, the team at PSC Flooring have over 30 years experience in the resin industry. PSC Flooring specialise in the application of industrial resin floor systems, polyurethane floor systems and epoxy floor coating systems.

PSC Flooring Limited are committed to provide a safe working environment for all its employees and as such a safe on site environment. All members of the PSC resin flooring installation teams have been thoroughly trained on each of the products we install. PSC are:

Safe Contractor approved

Achieving Safe Contractor accreditation demonstrates our commitment to health and safety and ensures we remain up to date year on year.

CSCS registered

All of PSC employees have completed health and safety training to CSCS standards. All employees receive regular product & installation training and PPE equipment as a matter of standard and have completed health and safety training to CSCS standards.

FeRFA members

PSC Flooring are members of FeRFA, the Resin Flooring Association is a not-for-profit organisation representing the leading manufacturers, specialist contractors and associated companies. FeRFA continues to take a leading role in developing national and international standards for resin flooring, screeding and surface preparation. In order to join FeRFA members must comply with the general FeRFA criteria in addition to those specific to their category of membership. As a member of FeRFA, PSC must agree to comply with the relevant FeRFA Code of Practice, Articles of Association, Bye Laws, Complaints Procedure and Association Rules and as such agree to support the activities of the Association, and be committed to training its workforce.

Offering a total flooring contractor package, encompassing site survey, specification, surface preparation & product installation, PSC Flooring have laid thousands of square metres of resin flooring systems throughout the UK. Servicing the Pharmaceutical, Food & Drink, Automotive, Engineering, and Warehousing & Electronics industries ensuring the highest standards in safety, quality & customer care.

Site Surveys & Specification

On site we will be able to accurately measure the space, answer your questions and discuss your requirements. It is important to be able to assess the state of the existing flooring substrate first-hand and to confirm the processes required to complete your project on budget. A site survey can take place at a time of your convenience.

Surface Preparation

When installing a resin floor system the substrate (existing floor surface) needs to be thoroughly prepared for the resin. It is important (regardless of age) that the substrate is completely stripped of any stains, adhesives, varnishes or paints to form a key for the resin. If the surface is not prepared properly, the floor coating will not adhere. We offer both a shot blasting and diamond grinding preparation service.

Crack & Joint Repairs

We offer a comprehensive crack and joint repair service that can be tailored to suit your needs. Localised damaged concrete, holes and bolt holes can be filled as required using a resin filler. In addition, post installation we can provide floor inspections and regular surface servicing.

Coving

The addition of coving to food safe flooring allows the floor material to extend seamlessly up the walls. Therefore, leaving dirt, dust, and germs with no place to hide. It is recommended that a 100mm high coving is added to food safe screed flooring to create a link between the wall to floor finish.

Demarcation Lines

Demarcation lines can be used to indicate pedestrian walkways, different floor levels or areas that are out of bounds/No entry. There are many colour options available with the most popular being Safety Yellow. Demarcation lines can be added at a later date, however it is more cost effective to have them installed at the same time as the floor.

Versatile flooring solutions for your Business needs

PSC Flooring are Industrial flooring experts. Operating all over the UK, the team at PSC Flooring have over 30 years experience in the resin industry. PSC Flooring specialise in the application of industrial resin floor systems, polyurethane floor systems and epoxy floor coating systems.

Versatile flooring solutions for Commercial spaces

Including retail spaces, reception areas, exhibition spaces, staff canteens, breakout spaces, toilet blocks etc.

Commercial Flooring

Light Engineering & Manufacturing Flooring

Heavy Duty Engineering & Manufacturing Flooring

Food Grade Flooring

Vehicle Workshop Flooring

Warehouse Flooring

3mm self leveling epoxy resin screeds are ideal for commercial spaces because it is:

- Impact resistant
- Easily cleanable
- Very hard wearing
- Chemically Resistant
- Can have a decorative finish
- Anti-slip if required

As commercial spaces usually have a high foot traffic flow it is imperative that commercial flooring is both level and hard wearing. 3mm self leveling epoxy resin screeds are ideal for high foot traffic situations as they are hard wearing, easy to clean, require low maintenance and give overall glossy aesthetic appeal.

Versatile flooring solutions for Engineering & Manufacturing

Including Aeronautical, Aerospace, Automotive, Casting, Chemical, Component, Fabrication, Forming, Joining, Machining, Manufacturing, Mechanical, Mechatronic, Moulding, Pharmaceutical, Print, and Shearing.

Heavy-duty polyurethane RT or HF screed is ideal for engineering and manufacturing flooring because it is:

- Impact resistant
- Easily cleanable
- Very hard wearing
- Chemically Resistant
- Can be laid to falls to help drainage
- Anti-slip in wet and dry working conditions

Heavy duty and impact resistant

Anti-slip if required

Budget friendly options available

Light Engineering & Manufacturing Flooring

Budget friendly, resin coatings are suitable for all types of light industrial and manufacturing facilities. High build epoxy resin coating systems are ideal for light engineering and manufacturing because it is:

- Fast to install - minimising downtime
- Suitable for HGVs, pallet trucks, stillages & fork trucks
- Totally impervious to grease, oil & fuel
- Easy to clean
- Anti-slip if required
- Demarcation lines can be applied in a variety of colours
- Value for money - Epoxy resin flooring is not expensive comparative to its lifespan

To meet HSE regulations demarcation lines, walkways, hatching and block colour areas can be applied to both Heavy-duty polyurethane RT or HF screed and High Build Epoxy Resin Coating Flooring Systems.

Both Heavy-duty polyurethane RT or HF screed and High Build Epoxy Resin Coating Flooring Systems are suitable for heavy-duty forklift truck traffic.

Versatile flooring solutions for Food & drink manufacturing

Bakeries, Confectioners, Dairies, Breweries Including Beer and Cider Production, Wines, Spirits and Whisky Distilling, Maltings, Butchers, Meat, Poultry and Fish Processing, Slaughterhouses / Abattoirs, Fruit and Vegetable Processing, Food Warehousing and Distribution, Restaurants, Commercial Kitchens and Food Manufacturers.

Heavy-duty polyurethane RT or HF screed applied at 6mm or 9mm is the normal choice for food & drink manufacture flooring because it is:

- **Hygienic and seamless** - does not support bacteria and microbial growth
- **Hard wearing and robust**
- **Totally Impervious** - able to withstand organic acids
- **Thermal shock resistant** - able to withstand direct temperatures up to 120°
- **Inbuilt anti-slip properties**
- **Can be complemented by coving**
- **Can be laid to falls to help drainage**

Heavy duty & impact resistant

Hygienic & seamless

Thermal shock resistant

Anti-slip in wet areas

Anti-Slip Can be laid in falls

Wet production areas in the food processing industry can be subject to milk, grease, fat and water especially in cheese and dairy production. Polyurethane resin screeds offer excellent slip resistance in the wet and can be laid to falls to help drainage helping to meet high health and safety standards.

Hygienic and seamless Can be complemented by coving

Coving is a seamless connection between the floor and the wall/vertical surface creating "one surface". The addition of coving allows the floor material to extend seamlessly up the walls – it is recommended that a 100mm high coving is added to food safe screed flooring to create a link between the wall to floor finish and equipment toe-kicks (toe kick/floor junctures).

Versatile flooring solutions for Garage & vehicle workshops

Garage Auto Workshops, MOT Centres, HGV Workshops, Body Shops & Franchise Garages

High build epoxy resin is ideal for vehicle workshop flooring because it is:

- **Fast to install** - can be completed over a weekend
- **Totally impervious** to grease, oil and fuel
- **Easy to clean**
- **Anti-slip** if required
- **Available in a variety of colours** so brand colours to be applied to the workshop floor
- **Demarcation lines can be applied** in a variety of colours
- **Value for money** - Epoxy resin flooring is not expensive comparative to its

Quick turn around timescale
- can be done in a weekend.

Demarcation lines can be added
- brand colours if required

Heavy duty and hard wearing
- Suitable for HGV traffic

Easy to clean

Vehicle workshop epoxy resin provides a gloss, attractive, easy to clean floor. Epoxy resin is very hard wearing, alongside excellent wear resistance it is also impervious. Any grease, oil and fuel will remain on the surface until cleaned up.

Demarcation lines around MOT bays, lifts, inspection pits etc.

The vital VOSA standard safety lining and MOT marking system can be achieved by locally applied demarcation lines. Bespoke combinations can be created to get the look you require and applied around high traffic pedestrian areas, scissor Lifts, rolling roads, wash bays, inspection pits, ramps and valeting bays.

Franchise Garages main dealerships, showrooms & repair franchises

To enhance the customer experience and uphold the brand image customers now expect clean, smooth, shiny floors throughout the dealership. High build epoxy resin allows company brand colours to be used on the workshop floor, and all customer facing areas. PSC have worked with a number of main dealer brands to bring that all important branded experience from the showroom right through into the service and repair garage.

ŠKODA

SEAT

Volkswagen

HYUNDAI

LAND ROVER

PEUGEOT

Mercedes-Benz

TOYOTA

VAUXHALL

Versatile flooring solutions for Warehouse flooring

As the beating heart of any manufacturing or distribution business, a busy warehouse is one of the toughest flooring environments out there. With HGVs, pallet trucks, stillages and fork trucks shift heavy loads up to 24 hours a day, seven days a week, there are budget friendly options available resin coatings or screeds which are suitable for all types of warehouses and storage facilities are easy to keep clean and allows you to maintain that glossy look for years to come.

High build epoxy resin is ideal for warehouse flooring because it is:

- **Fast to install** - minimising downtime
- **Suitable for HGVs, pallet trucks, stillages and fork trucks**
- **Totally impervious** to grease, oil and fuel
- **Easy to clean**
- **Anti-slip** if required
- **Demarcation lines** can be applied in a variety of colours
- **Value for money** - Epoxy resin flooring is not expensive comparative to its lifespan

Heavy duty and impact resistant

Anti-slip if required

Budget friendly options available

Quick to Install

Epoxy resin is the ideal for warehouse flooring as operational downtime can be kept to a minimum. With options starting from as little as 4 hours drying time per coat and by installing using out of hours and phased work programmes it is possible to accommodate most clients.

Demarcation lines Health & Safety walkways & gangways

With a variety of colours available a highly visible safety yellow is usually recommended for demarcation lines. Create designated walkway and gangway demarcation helps to ensure awareness for staff and visitors of pit falls such as a dramatic change in level and moving traffic to meet Health and Safety Executive guidelines.

The right choice heavy duty, impact resistant and easy to clean

Choosing the right warehouse floor can help you to keep dust levels down and generally make it easier to send out your products in better condition. Dependent on budget available resin coatings or screeds which are suitable for all types of warehouses and storage facilities are easy to keep clean and allows you to maintain that glossy look for years to come. Epoxy resin is totally impervious and therefore any grease, oil and fuel will remain on the surface until cleaned up making it ideal for Warehouse flooring. Heavy-duty so able to accommodate forklift truck and pallet truck traffic, resistant to impact, abrasion, chemical and heat damage, yet easy to clean and maintain.
